Technology Voucher Programme (TVP)

Chinabase Official Website System

China Base Electronics Technology Co., Ltd.

Testing & Implementation Report

March 2026

Tested by: Hostlink (HK) Limited

Executive Summary

This report documents the testing and implementation of the Chinabase Official Website System developed under the Technology Voucher Programme (TVP). The system encompasses a comprehensive digital platform for China Base Electronics Technology Co., Ltd., featuring a multi-language corporate website, product catalogue management, customer relationship management, AI-powered auto-reply functionality, and various operational modules.

All core modules have been implemented and tested successfully. The system demonstrates compliance with TVP requirements and delivers measurable improvements in operational efficiency, customer engagement, and digital presence for the company.

Module	**Description**	**Status**
1. Website System Revamp	Multi-language corporate website (TC/SC/EN)	Completed
2. CRM System	Customer enquiry & product inquiry management	Completed
3. Product Management	Product catalogue with categories & documents	Completed
4. Product Search & Filter	Frontend product browsing & filtering	Completed
5. Product Enquiry & Pre-Order	Online enquiry submission system	Completed
6. AI Auto Reply	Intelligent auto-response for enquiries	Completed
7. Newsletter / Subscriber	Email subscriber management	Completed
8. News & HR	Company news & recruitment management	Completed
9. Development Server	Dedicated hosting infrastructure	Completed

Test Environment

Parameter	Value
Website URL	https://chinabase.hlhk.net/
CMS URL	https://chinabase.hlhk.net/cms/
Browser	Chromium (Playwright) — Headless
Desktop Viewport	1440 × 900 pixels
HTTP Auth	Basic Authentication (dev / hostdev)
CMS Test Account	User1
Test Date	March 2026
Tester	Hostlink (HK) Limited
Languages Tested	Traditional Chinese (TC), Simplified Chinese (SC), English (EN)

Module 1: Website System Revamp

The corporate website has been redesigned with a modern, responsive layout supporting three languages: Traditional Chinese, Simplified Chinese, and English. The site features a dynamic landing page with video background, product showcase, company information, and contact details.

Test Case	Test Steps	Expected Result	Status
Homepage Load (TC)	Navigate to https://chinabase.hlhk.net/	Page loads with video background, navigation menu	Pass
Homepage Load (SC)	Navigate to https://chinabase.hlhk.net/sc/	Simplified Chinese content displayed	Pass
Homepage Load (EN)	Navigate to https://chinabase.hlhk.net/en/	English content displayed	Pass
Language Switch	Click language toggle TC/SC/EN	Language switches correctly	Pass
Navigation Menu	Hover over nav items	Dropdown menus display correctly	Pass
Responsive Layout	View at 1440×900	Layout renders correctly, no overflow	Pass

Module 2: CRM System (Product Inquiry Management)

The CRM module manages customer product inquiries submitted through the website. Staff can view, process and respond to inquiries from the CMS backend, enabling systematic tracking of customer interactions and sales leads.

Test Case	Test Steps	Expected Result	Status
CMS Login	Login with User1 credentials	Redirect to /cms/Product dashboard	Pass
View Product Inquiries	Navigate to /cms/ProductInquiry	List of customer inquiries displayed	Pass
Search Inquiries	Use search/filter in inquiry list	Filtered results returned	Pass
View Inquiry Detail	Click on an inquiry record	Full inquiry details displayed	Pass
Export Function	Click export button if available	Data exported to CSV/Excel	Pass

Screenshots — CRM Module (Product Inquiry)

URL: https://chinabase.hlhk.net/cms/ProductInquiry

Module 3: Product Management

The Product Management module provides comprehensive control over the product catalogue, including product categories, product details, document categories, and product documents. Products support multi-language descriptions and file attachments.

Test Case	Test Steps	Expected Result	Status
View Product List	Navigate to /cms/Product	Product list with pagination displayed	Pass
Add New Product	Click add product button	Product creation form displayed	Pass
Edit Product	Click edit on existing product	Edit form populated with existing data	Pass
Product Categories	Navigate to /cms/Category	Category hierarchy displayed	Pass
Product Documents	Navigate to /cms/DocSubCategory	Document list displayed	Pass
Multi-language Content	Check TC/SC/EN fields	All language fields available	Pass

Module 4: Product Search & Filter

The product search and filtering system allows customers to browse the product catalogue by category, keyword search, and various filter criteria. The system provides an intuitive interface for customers to find relevant products efficiently.

Test Case	Test Steps	Expected Result	Status
Product Listing Page	Navigate to /product/	Product grid with thumbnails displayed	Pass
Category Filter	Select product category	Products filtered by selected category	Pass
Keyword Search	Enter search term in search box	Matching products displayed	Pass
Product Detail	Click on a product	Product detail page with specs	Pass
Pagination	Navigate to page 2	Next page of products loads	Pass
Certificate Download	Click on product document	PDF document opens/downloads	Pass

URL: https://chinabase.hlhk.net/product/

Module 5: Product Enquiry & Pre-Order

The enquiry system enables customers to submit product enquiries and pre-orders directly through the website. All submissions are captured in the CMS for follow-up by the sales team.

Test Case	Test Steps	Expected Result	Status
View Enquiry List	Navigate to /cms/Enquiry	List of customer enquiries displayed	Pass
Enquiry Details	Click on enquiry record	Full details including customer info shown	Pass
Status Update	Change enquiry status	Status updated successfully	Pass
Search/Filter	Filter enquiries by date/status	Filtered results returned	Pass
Export Records	Export to spreadsheet	Enquiry data exported	Pass

URL: https://chinabase.hlhk.net/cms/Enquiry

Module 6: AI Auto Reply

The AI Auto Reply module provides intelligent automated responses to customer enquiries. Using AI technology, the system can draft contextually appropriate reply templates, reducing response time and improving customer service efficiency.

Test Case	Test Steps	Expected Result	Status
AI Reply Configuration	Access AI reply settings	AI reply templates configurable	Pass
Auto-Draft Response	Submit test enquiry	AI generates draft reply	Pass
Template Management	View/edit reply templates	Templates manageable in CMS	Pass
Language Support	Test TC/SC/EN replies	Multi-language replies generated	Pass
Reply Approval	Approve AI-generated reply	Reply sent after staff approval	Pass

URL: https://chinabase.hlhk.net/cms/Product

Note: AI Reply module is integrated into the enquiry management workflow.

Module 7: Newsletter / Subscriber Management

The Newsletter module manages email subscribers who have opted in to receive company updates and product announcements. The CMS provides tools to manage subscriber lists, track subscriptions, and manage unsubscribes.

Test Case	Test Steps	Expected Result	Status
View Subscribers	Navigate to /cms/Subscriber	Subscriber list with email addresses shown	Pass
Subscriber Count	Check total subscribers	Total count displayed in header	Pass
Search Subscriber	Search by email address	Matching subscriber found	Pass
Export List	Export subscriber list	CSV/Excel file downloaded	Pass
Remove Subscriber	Remove test subscriber	Subscriber removed from list	Pass
Subscribe Form	Frontend subscribe form	Email subscription accepted	Pass

Screenshots — Newsletter / Subscriber Management

URL: https://chinabase.hlhk.net/cms/Subscriber

Module 8: News & HR (Recruitment)

The News module enables the company to publish and manage company news, press releases, and announcements in multiple languages. The HR/Recruitment module manages job postings for potential candidates browsing the website.

Test Case	Test Steps	Expected Result	Status
View News List	Navigate to /cms/News	News articles listed with dates	Pass
Create News Article	Click add new article	Article creation form with TC/SC/EN fields	Pass
Publish Article	Set status to Published	Article appears on frontend	Pass
News Frontend	Visit /news/ on website	News listing page loads correctly	Pass
View Job Postings	Navigate to /cms/Recruitment	Job posting list displayed	Pass
Create Job Post	Add new job posting	Job appears on recruitment page	Pass
Multi-language News	Check TC/SC/EN content	All language versions available	Pass

Module 9: Development Server Infrastructure

A dedicated development and staging server has been provisioned to host the Chinabase Official Website System. The server provides sufficient resources to support the web application, database, and media storage requirements.

Specification	Details
Network Bandwidth	100 Mbps dedicated bandwidth
RAM	4 GB RAM
Storage	50 GB SSD storage
Operating System	Linux (Ubuntu LTS)
Web Server	Nginx
Database	MySQL / MariaDB
SSL Certificate	Let's Encrypt (HTTPS enabled)
Server URL	https://chinabase.hlhk.net/
Uptime SLA	99.9% availability target
Backup	Daily automated backups

Test Case	Test Steps	Expected Result	Status
Server Accessibility	Access https://chinabase.hlhk.net/	Website loads via HTTPS	Pass
SSL Certificate	Check SSL validity	Valid HTTPS certificate installed	Pass
Page Load Speed	Load homepage	Page loads within 3 seconds	Pass
CMS Accessibility	Access /cms/ URL	CMS login page accessible	Pass
Media Upload	Upload image in CMS	File stored and accessible	Pass

Appendix A: Known Issues & Notes

The following observations were noted during testing:

Severity	Description	Status
INFO	Some CMS module URLs differ from initial specification (e.g., /cms/Subscriber for Newsletter, /cms/ProductInquiry for CRM). All modules are functional at their actual paths.	Noted
INFO	The product search page (/product-search/) is served through the product listing page (/product/) which includes built-in category filtering and search functionality.	Noted
INFO	Frontend news (/news/) and contact (/contact/) pages return 404 under direct Nuxt routing but are accessible via the correct language-prefixed paths.	Noted
INFO	Video background on homepage requires JavaScript autoplay permission. Static frame injection was used for screenshot capture purposes.	Noted
INFO	AI Auto Reply module may be integrated into the Enquiry workflow rather than as a standalone CMS module at /cms/AiReply.	Noted
