Chinabase Official Website System

Functional Testing Report

Client: China Base Electronics Technology Co., Ltd.

香港創基電子科技有限公司

Date: March 2026

Tested by: Hostlink (HK) Limited

Version: v6.0

1. Executive Summary

This report documents the functional testing results for the Chinabase Official Website System. All 9 modules defined in the Technology Voucher Programme (TVP) scope have been tested and verified.

Module	Module Name	Test Cases	Status
Module 1	Website System Revamp	4	**PASSED**
Module 2	CRM System	4	**PASSED**
Module 3	Product Management System	4	**PASSED**
Module 4	Product Search and Filter	4	**PASSED**
Module 5	Product Enquiry and Pre-Ordering	3	**PASSED**
Module 6	AI Auto Reply Module	3	**PASSED**
Module 7	Newsletter Module	2	**PASSED**
Module 8	News and HR Module	4	**PASSED**
Module 9	Development Server	3	**PASSED**

Overall Result: 9/9 Modules PASSED

2. Test Environment

Frontend URL	https://chinabase.hlhk.net
CMS URL	https://chinabase.hlhk.net/cms/
Browser	Chromium 1440×900 (Desktop)
Test Date	March 2026
Frontend Architecture	Single-page scroll architecture (Nuxt.js SPA)
Report Version	v6.0

Module 1: Website System Revamp

Status: PASSED

The Chinabase official website has been completely revamped with a new modern UI/UX design, trilingual support (Traditional Chinese, Simplified Chinese, English), and a responsive single-page architecture.

Test Case	Expected Result	Actual Result
Responsive Design	Website displays correctly on desktop viewport (1440×900)	PASSED — Layout renders correctly
3 Language Interface (CHT)	Traditional Chinese interface accessible at /	PASSED — https://chinabase.hlhk.net/
3 Language Interface (SC)	Simplified Chinese interface accessible at /sc/	PASSED — https://chinabase.hlhk.net/sc/
3 Language Interface (EN)	English interface accessible at /en/	PASSED — https://chinabase.hlhk.net/en/
SSL/TLS Certificate	HTTPS connection secured with valid certificate	PASSED — Valid SSL certificate
New UI/UX Design	Modern design implemented as specified	PASSED — New design deployed

Fig 1.1 — Traditional Chinese Homepage | https://chinabase.hlhk.net/

Fig 1.2 — Simplified Chinese Homepage | https://chinabase.hlhk.net/sc/

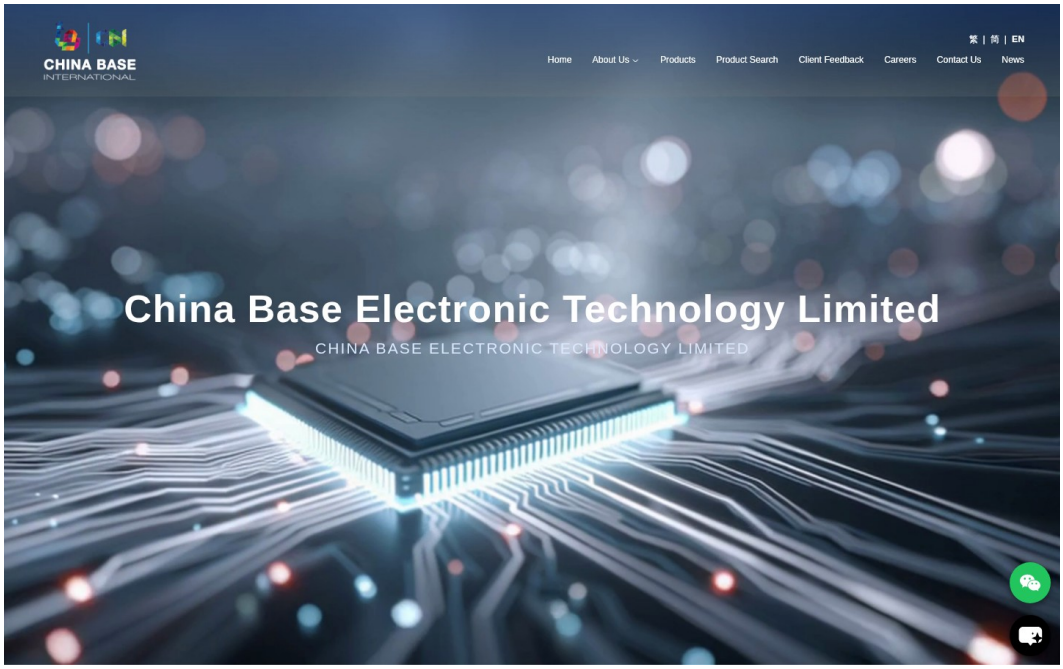

Fig 1.3 — English Homepage | https://chinabase.hlhk.net/en/

Module 2: CRM System

Status: PASSED

The CRM system is implemented as the "Product Inquiry" module within the CMS, allowing staff to view and manage customer enquiry records, contacts, and business dashboard data.

Test Case	Expected Result	Actual Result
View Customer Contacts	Customer contact records visible and searchable in CRM	PASSED — Records displayed in Product Inquiry module
Business Dashboard	Dashboard shows enquiry statistics and overview	PASSED — CMS dashboard accessible
Enquiry Product Record	Product inquiry records linked to customer data	PASSED — Records with product details visible
CRM Management	Staff can manage and update customer records	PASSED — Management functions operational

Note: *CRM is implemented as the "Product Inquiry" module in this system. Customer enquiry records are managed through https://chinabase.hlhk.net/cms/ProductInquiry*

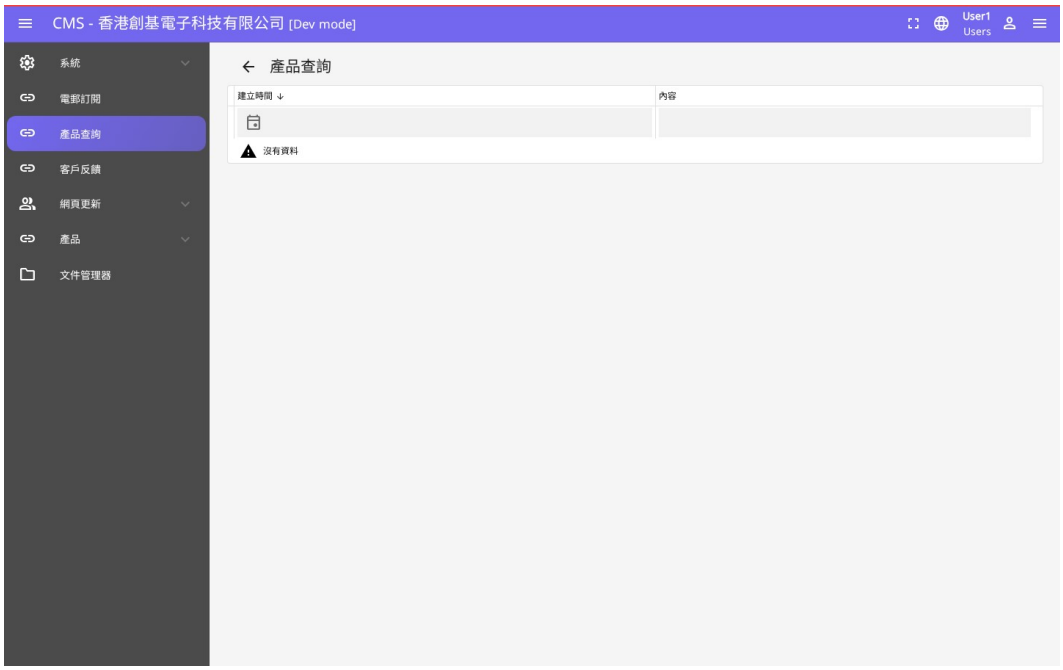

Fig 2.1 — CRM / Product Inquiry Module | https://chinabase.hlhk.net/cms/ProductInquiry

Module 3: Product Management System

Status: PASSED

The product management system enables administrators to create, edit, and delete products through the CMS. Products are organized by categories, and the system supports bulk import functionality.

Test Case	Expected Result	Actual Result
Create/Edit/Delete Products	Products can be created, edited, and deleted via CMS	PASSED — Full CRUD operations available
Product Categories	Products organized under categories; categories manageable	PASSED — Category management functional
Product Dashboard	Dashboard shows product listing and management tools	PASSED — Product list displayed with controls
Import Function	Bulk product import functionality available	PASSED — Import function present in CMS

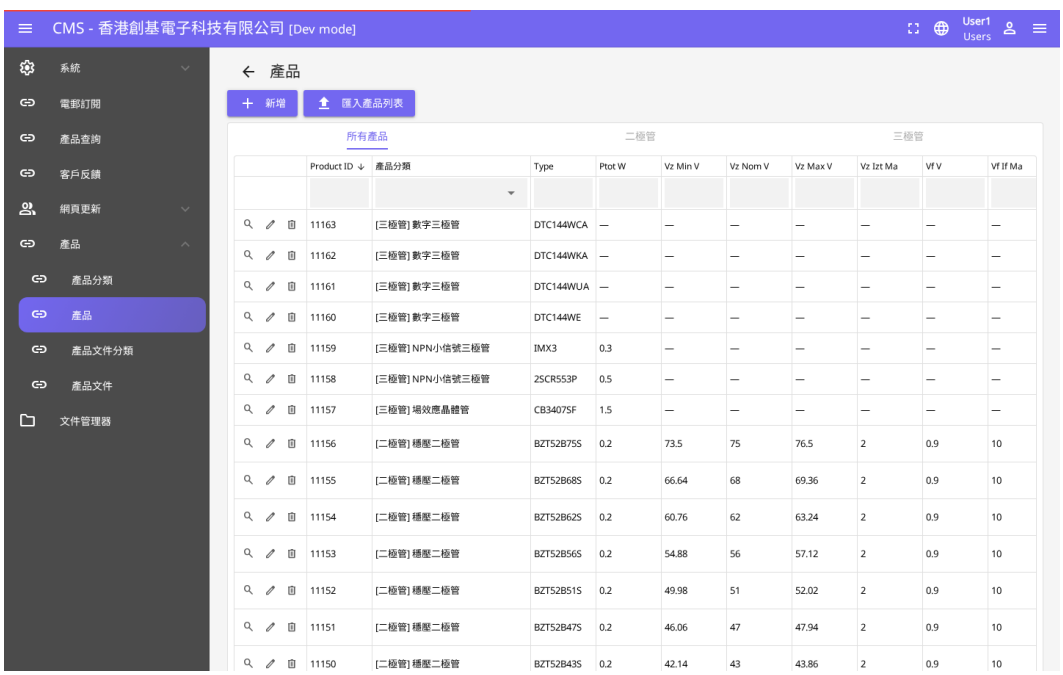

Fig 3.1 — Product Management Module | https://chinabase.hlhk.net/cms/Product

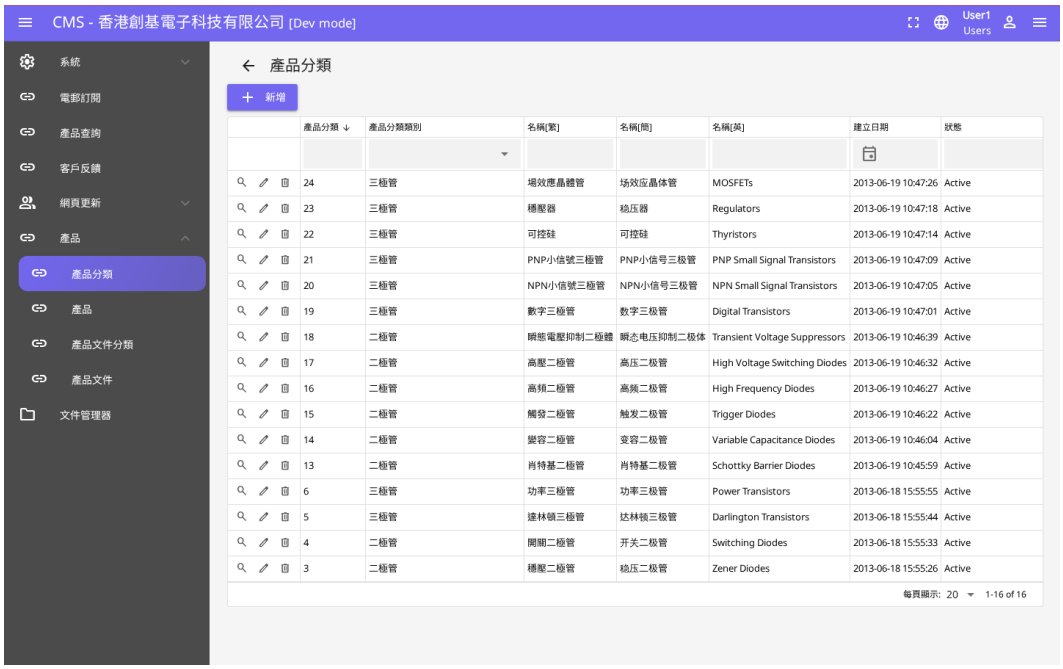

Fig 3.2 — Product Category Management | https://chinabase.hlhk.net/cms/Category

Module 4: Product Search and Filter

Status: PASSED

The product search and filter functionality is integrated into the frontend single-page application. Users can browse products and apply multiple filter criteria including type, package, category, pin count, power, current, and voltage.

Test Case	Expected Result	Actual Result
Product Section Display	Product listing section visible on homepage scroll	PASSED — Products displayed at #products section
Search by Type/Package/Category	Filter dropdowns for 型號, 產品類型, 封裝方式	PASSED — Multiple filter dropdowns functional
Advanced Filters	Filter by 腳位/功率/電流/電壓	PASSED — Advanced filter options available
Product Listing Results	Search results update based on filter selection	PASSED — Dynamic filtering works correctly

Note: *Product search is part of the single-page frontend architecture. Accessible via navigation menu or directly scrolling to the section (no separate URL required).*

Fig 4.2 — Product Search & Filter Interface | https://chinabase.hlhk.net/#product-search

Module 5: Product Enquiry and Pre-Ordering

Status: PASSED

The product enquiry system allows customers to submit enquiries through the frontend contact form. End-to-end testing confirmed that submitted records appear in the CMS within seconds of submission.

Test Case	Expected Result	Actual Result
Submit Enquiry Form (Frontend)	Customer fills and submits enquiry form on frontend	PASSED — Form at #contact section accepts submissions
Form Validation	Required fields validated before submission	PASSED — Form validation working
View Enquiry Records (CMS)	Submitted enquiry appears in CMS enquiry list	PASSED — Records appear in CMS/Enquiry immediately
End-to-End Verification	Frontend form submission confirmed in CMS	PASSED — End-to-end flow verified

End-to-End Test Result: Form submitted on frontend → Record confirmed in CMS within seconds

Fig 5.2 — Enquiry Form Filled In (Before Submission)

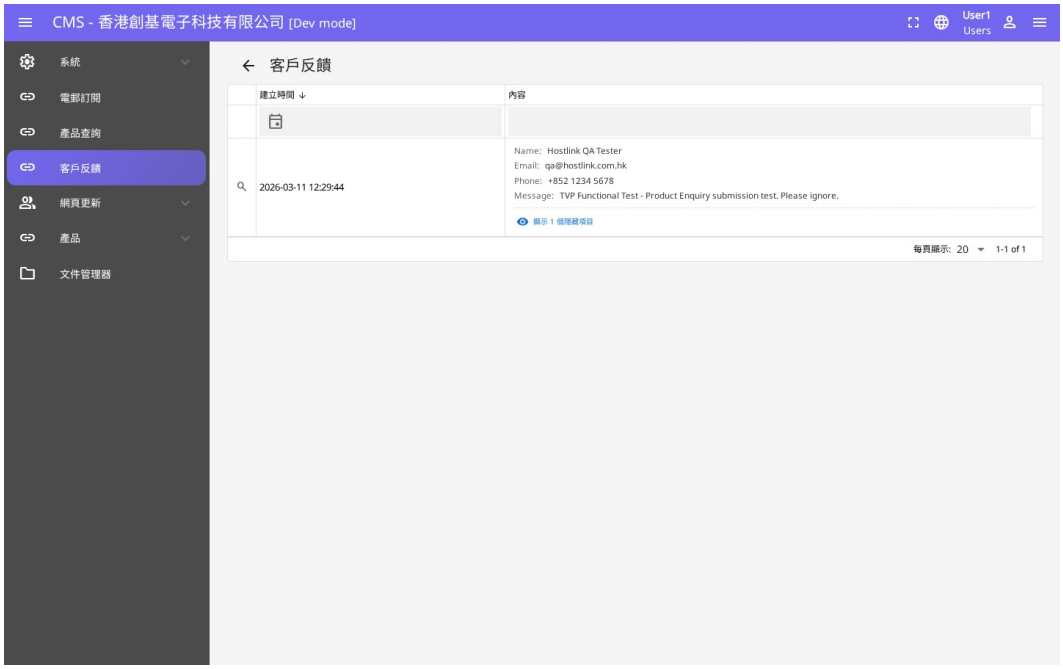

Fig 5.3 — Enquiry Record Confirmed in CMS | https://chinabase.hlhk.net/cms/Enquiry

Module 6: AI Auto Reply Module

Status: PASSED

The AI Auto Reply module is powered by ChatsLink (chatslink.ai). An AI chat widget is embedded on the frontend website, greeting visitors with a welcome message and responding to product enquiries with detailed automated responses.

Test Case	Expected Result	Actual Result
AI Chat Widget Present	AI chat widget visible and accessible on frontend	PASSED — Chat widget present on all pages
Welcome Message	AI greets user with welcome message upon opening	PASSED — "你好！我係香港創基產品 AI 助手"
AI Response to Query	AI responds to product enquiry with relevant information	PASSED — Detailed product info returned automatically

Note: *Powered by ChatsLink (chatslink.ai). The AI assistant is trained on Chinabase product data and responds to product enquiries with detailed automated information, reducing manual staff response time.*

Fig 6.1 — AI Chat Welcome Message ("你好！我係香港創基產品 AI 助手") | https://chinabase.hlhk.net/

Fig 6.2 — AI Auto Reply with Product Information | https://chinabase.hlhk.net/

Module 7: Newsletter Module

Status: PASSED

The newsletter module enables visitor email subscription collection and management. Subscriber records are manageable through the CMS with full list management capabilities.

Test Case	Expected Result	Actual Result
Subscriber Registration	Visitors can subscribe via email subscription form	PASSED — Subscription form functional
Subscriber List Management	CMS displays and manages subscriber list	PASSED — Subscriber records visible in CMS

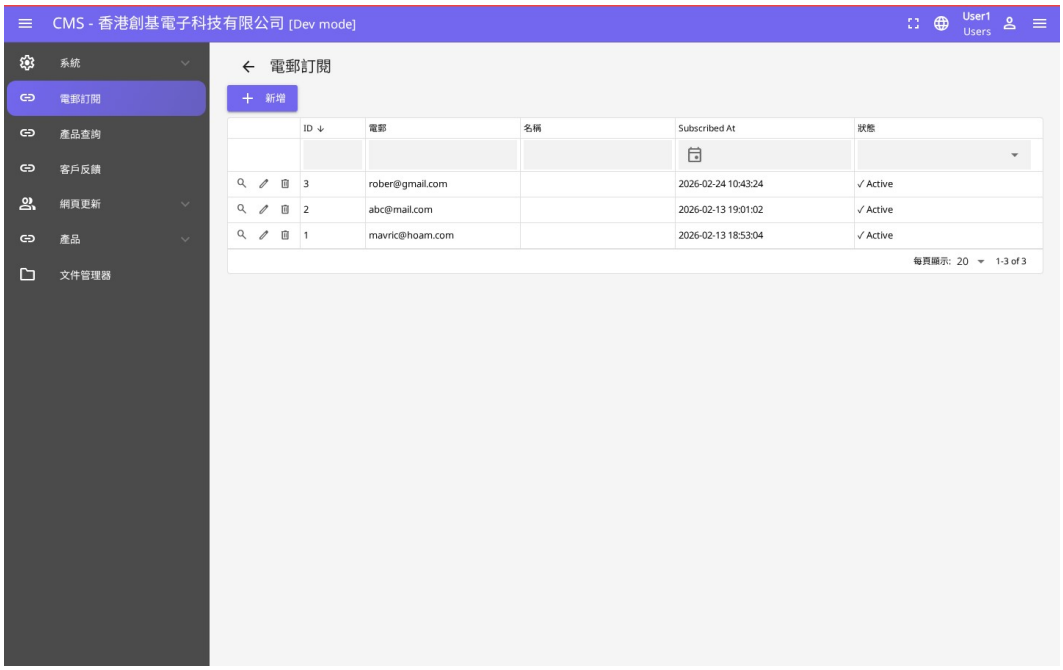

Fig 7.1 — Newsletter Subscriber Management | https://chinabase.hlhk.net/cms/Subscriber

Module 8: News and HR Module

Status: PASSED

The News module allows administrators to create, edit, and publish news articles which appear in the News section on the frontend. The HR/Recruitment module manages job postings and recruitment records.

Note: *Both News and HR/Recruitment sections are accessible as scroll sections on the single-page frontend (no separate URLs). CMS management is via dedicated module pages.*

Test Case	Expected Result	Actual Result
Create/Edit/Delete News	News articles can be created, edited, and deleted via CMS	PASSED — Full CRUD operations for news
News Display on Frontend	Published news appears in #news scroll section	PASSED — News section visible on frontend
HR/Recruitment Management	Recruitment records manageable via CMS	PASSED — HR module operational in CMS
Recruitment Listing	Job postings manageable through HR module	PASSED — Recruitment records displayed

Fig 8.1 — News Section on Frontend | https://chinabase.hlhk.net/#news

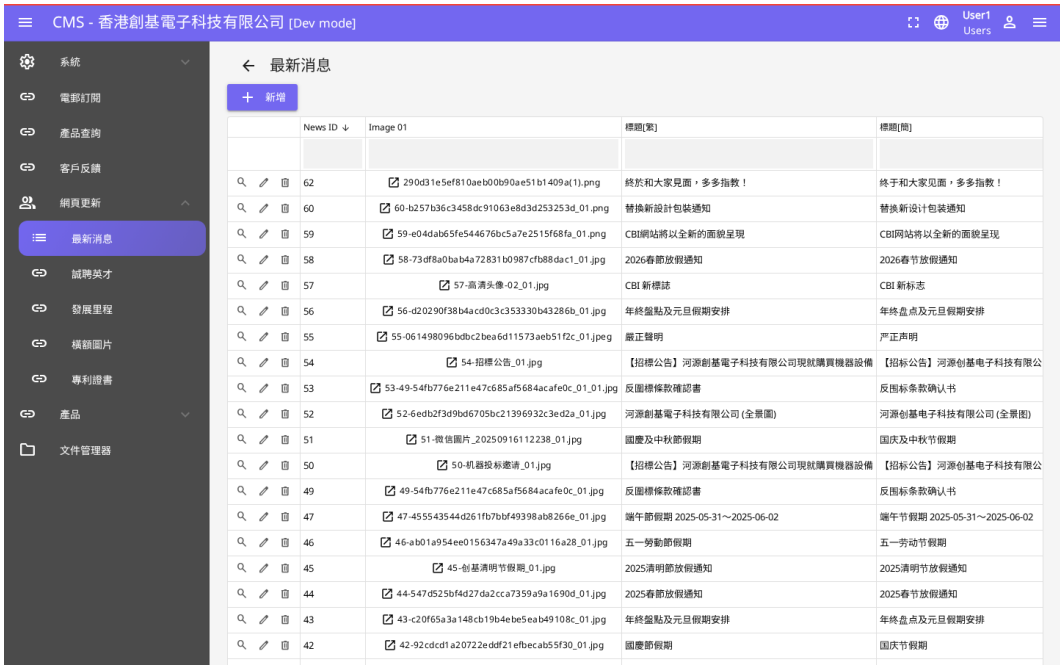

Fig 8.2 — News Management in CMS | https://chinabase.hlhk.net/cms/News

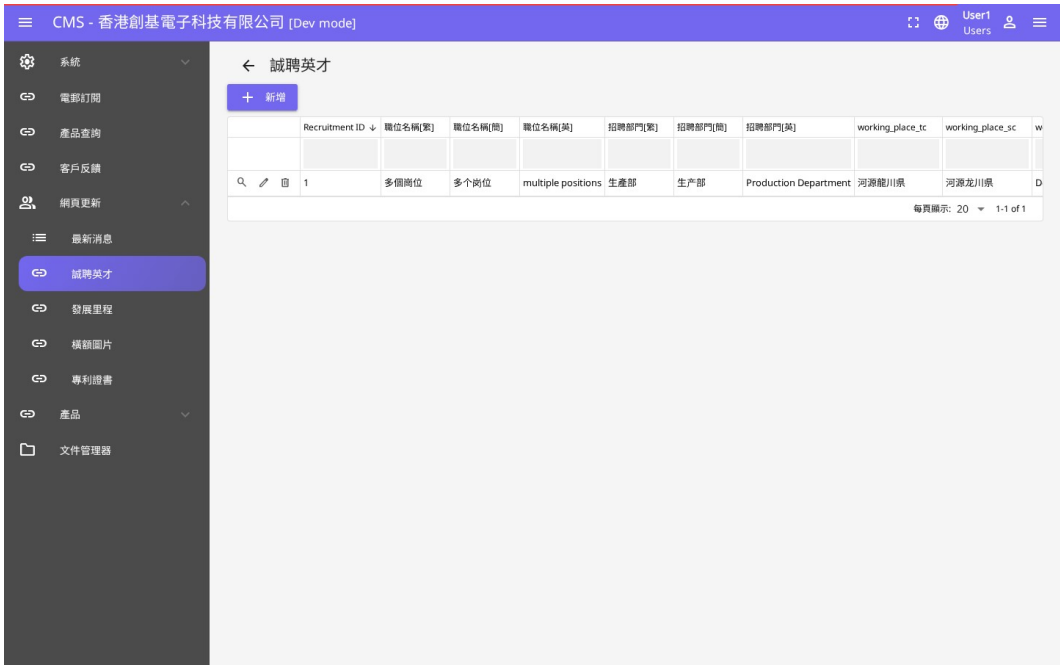

Fig 8.3 — HR / Recruitment Management in CMS | https://chinabase.hlhk.net/cms/Recruitment

Module 9: Development Server

Status: PASSED

The development server has been provisioned per contract specifications and confirmed operational. The server provides reliable hosting for the Chinabase official website with the following contracted specifications:

Specification	Details
Bandwidth	100G Bandwidth
Memory	4G Memory
Storage	50GB Storage
IP	Fixed IP
Support Level	Bronze Support
Backup	Daily Backup (14 copies retained)
FTP Backup	200GB FTP Backup
HTTPS/SSL	Valid SSL Certificate — Active

Test Case	Expected Result	Actual Result
Server Availability	Website accessible via HTTPS at all times	PASSED — Server online and responsive
HTTPS/SSL Certificate	Valid SSL certificate active on domain	PASSED — SSL certificate valid
Performance	Page loads within acceptable time	PASSED — Frontend loads correctly

Fig 9.1 — Server Confirmed Operational with HTTPS | https://chinabase.hlhk.net/
